

Empower your staff with Microlearning Solutions from **Dynamic Health**

Nursing best practices and clinical information are constantly changing, and **Dynamic Health** provides your staff with access to world-class clinical resources at the point of care.

Decrease learning barriers, increase access.

Microlearning suggests that breaking down new information into smaller, more frequent sessions supports knowledge retention, increases the rate of skill-building, and helps reduce cognitive load.

Earn CE credits anytime, anywhere

Dynamic Health enables learning and practice to be combined at your teams' fingertips. With Dynamic Health your healthcare providers can earn CE credits while searching for clinical answers or learning new skills at the point of care.

With your team wherever they go

By earning credits at the point of care, nurses and allied healthcare professionals can optimize their time with patients and enhance their professional growth.

Visibility into your teams' progress with Dynamic Health Insights

Measure staff progress and track usage with built-in analytics.
