

Diversity, Equity and Inclusion in Collection Development

Enhance your library's diversity-focused content.

As libraries look to provide a comprehensive collection for their users, there is an increasing need to provide content in a broad range of important and inclusive subjects. There are many ways GOBI can help libraries create a diverse print book and e-book collection that includes content on a wide range of ethnic, cultural, socio-economic and inclusive topics to truly represent a global perspective.

Let GOBI Library Solutions help you to:

- Analyze the diversity of your collection using bibliographic and reporting tools, and by reviewing purchase and holdings data
- Build an ongoing solution by creating a process to deliver diverse material on a continuing basis using profiling tools through GOBI, tracking and adjusting as needed

In addition, GOBI offers a range of services to support collection development of diverse content.
