

# NoveList Select

The next read,  
**guaranteed!**

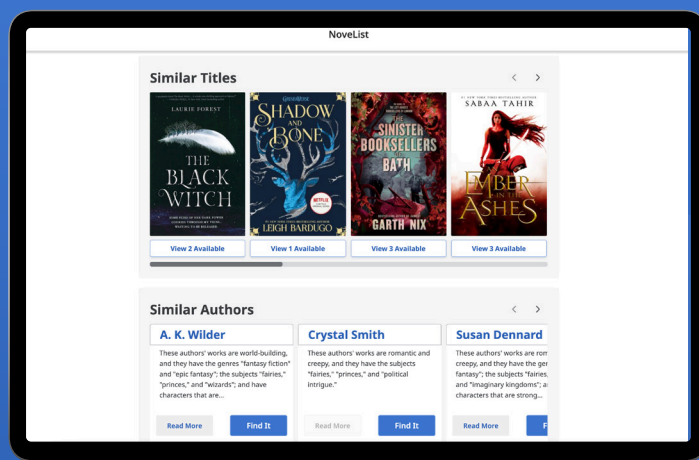

## Power up your catalog records!

NoveList Select supercharges individual book records in library catalogs. Powered by the incredible metadata in NoveList, readers can find their next favorite read within their catalog searches.

Brought to  
you by the  
**book experts**  
at NoveList.

- ✓ **Human experts behind every recommendation.** NoveList is all about connecting readers with books that are right for them. We've been delivering book recommendations for more than 30 years. Human experts are behind every decision, curating data elements, and providing reasons why a book is recommended.
- ✓ **We explain *why* a recommendation is made — something no other service offers.** Our popular "reason why" language, written and signed by our book experts, helps readers decide if a book, author, or series will be right for them. No more dead-end searches — just satisfied readers. Our job is to support the joy that reading brings to people.
- ✓ **Finding the perfect fit just got easier!** Does NoveList Select filter to a collection? Yes, it does! You can choose whether NoveList Select filters for just the titles in your collection. And we've got your back when it comes to student readers. With Accelerated Reader levels and Lexile measures, finding books that are a great match is easier.
- ✓ **Exclusive features are included.** Story Finder, the much-loved story elements mixer in NoveList Select, helps readers discover titles they may never have found before, based on the aspects of a book that mean the most to them. The "On The Shelf" feature can be added at no cost for real-time availability (**works with most ILs**).

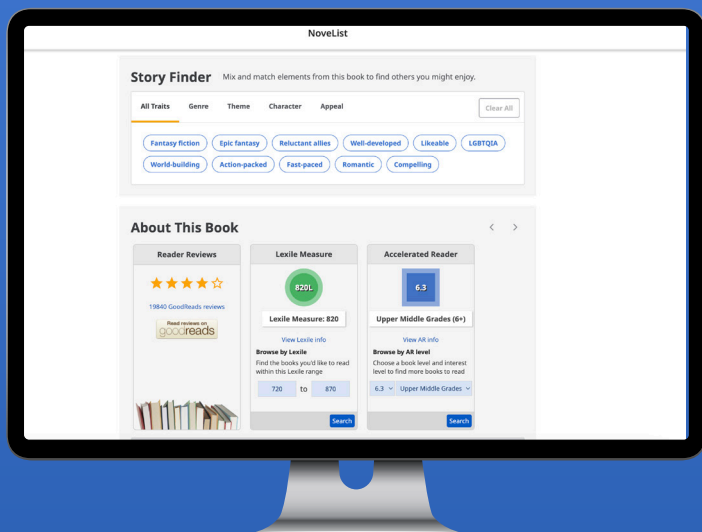

# NoveList Select Analytics Dashboard

**More than results: Make data-based decisions about your collection.**

Love data and proud of it? We're here to help. There are two categories to aid your staff in monitoring collection usage:

- ✓ **Reader Engagement** provides measures of engagement, as well as more focused measures of interaction within your catalog, including views and clicks. You can nerd out with multiple charts that slice and dice your data or get a top-line view.
- ✓ **Reader Insights** provides a detailed analysis of NoveList Select's views data. You can get insight into what titles, authors, and series are most popular with your readers. Using the Reader Engagement and Reader Insight tools, your staff can monitor your collection's activity in real time.
