

# Panorama™

## Library Analytics & Data Security. Done Right.

Combine siloed resources, remove offline data storage and protect user information – all within a single library analytics platform.

### How Secure is Your Library Analytics Data?

If your library struggles with the manual process of gathering, storing and saving library data for analysis, then you are poised to face a number of risks. Panorama offers a comprehensive strategy to secure library analytics by streamlining disparate data sources, providing cloud-hosted technology and leveraging authentication analytics – all within a platform that meets privacy regulations.

### Say Goodbye To:

- ⊗ Losing data
- ⊗ Privacy concerns
- ⊗ Manual retrieval
- ⊗ Reliance on offline storage
- ⊗ Old technology & systems

# Security and Privacy at Work

User data is secure, accurate and anonymous.

- Automatic refreshes ensure accurate data is being viewed

Cloud-hosted technology protects data and prevents loss of data

## We Work With You

Whether you work with our implementation team or contract our Professional Services team, we will work with your library to ensure effective data security and understand unique security challenges.

## Customize Your Data Needs

Customize your data choices to align the platform to your library's mission and needs. Enjoy the flexibility in selecting your data sources.
